### Description

Coming from a hybridization of Hosta Pineapple upsidedown cake.

Extraordinary small hosta.

Height : about 25/30 cm.

Width : about 30/40 cm.

Dimensions of the leaves : 14x2 cm.

Yellow/green spear-shaped leaves, very thin and with particularly corrugated sides.

If the plant is in full sunlight, the leaves may turn to white color.

Lavender color flowers in summer.

Our observations at the Relevant nursery in August 2022: in our opinion, this variety seems to be the most floriferous. For example, on a plant that has been cultivated for 2 years, about 10 amazing flower stems developed and stayed for more than 3 weeks.

**Big rhizome delivered in a 1-liter plastic pot.**
