Description

Featuring a twin-trunk shakan style, this tree embodies a unique elegance. It reaches a height of 380 mm and spans an impressive branch width of 650 mm.

The trunk diameters, measuring between 40 and 50 mm, lend a substantial presence to the subject.

The nebari, with a span of 140/150 mm, anchors this tree in a quality handcrafted Yixing Chinese pottery, with dimensions of 260*260*150 mm, displaying an unglazed finish.

Originating from a yamadori of over 60/80 years old, this pine boasts admirable trunk conicity and carefully developed bark.

On the backside, a discreet and natural shari adorns the trunk, featuring an aged appearance with cracks that add a natural and authentic effect. The diagonally reclined base of the trunks imparts a distinctive character to this bonsai.

This style of pine, relatively rare in collections, will captivate the passionate soul of an enlightened enthusiast.

An authentic bonsai adorned with original jin and shari, it clearly distinguishes itself from tanuki counterfeits.

Currently ligatured with copper wire, requiring special attention by March 2024, this tree presents no major injuries from wires or cutting. The selection of this bonsai is based on its undeniable beauty and the moderately long needles, slightly tinted blue, a rare trait among seedlings. It has won the heart of Guy Maillot, a passionate bonsai lover.

Please note that the stand is not included. Photographs dated August 2023 offer a comprehensive view of this specimen from every angle.
