### Description

Authentic stainless steel bonsai watering can imported from Japan. Sold with one fine angled rose (ref. [7239](#)). Capacity: 6 liters. Tank diameter: 190 mm – Total height: 180 mm – Spout length: 700 mm. Equipped with a mesh filter at the filling point and a reinforced support handle. Used by all professional bonsai growers in Japan. Filter included. If your water is low in lime (non-calcareous), it is preferable for the health of your bonsai. The most practical solution for watering your bonsai and the best value for money on the French market. [See its manufacturing process in Japan in our photo gallery.](#)
