Description

Plant dimensions: approx. 15 × 30 cm

Leaf dimensions: approx. 5 × 5 cm Medium-sized leaves, strongly wavy and curled in on themselves. The leaves are light yellow-green along the edges and dark green in the center. Lavender-colored flowers bloom in summer. Growing this superb variety in a pot helps reduce leaf size, making it suitable for use as a kusamono or companion plant for bonsai. Large rhizome delivered in a 2-liter plastic container.
