Description

Exceptional bonsai for collectors.
Tree height alone: 300 mm. Branch spread: 280 mm.

Presented in a high-quality unglazed handmade pot by Master XHU, Yixing (China), measuring 170 × 140 × 55 mm. Moyogi-style bonsai featuring outstanding ramification, complemented by well-integrated jins. Trunk diameter :40 mm, nebari : 100 mm.

Grown from selected seedlings with short, blue-tinged needles, chosen according to the selection of Master Shiraichi. A beautiful mame bonsai with a sinuous trunk and well-developed, mature bark, including on the surface roots. Cultivated by Master Shiraichi-san for over 30 years. No major pruning scars or traces of previous wiring. Currently wired with copper wire for structural maintenance. Repotted in pure akadama at the end of spring 2025. Full sun exposure is recommended to maintain optimal coloration. Fertilization advised from June to October using Bio Gold fertilizers. Photographed in December 2025. Display stand not included.
