Description

Dimensions: Ø 12.5*4 cm. Made in small quantities, this round pot with Oriental rivets is from an area of China famous for its quality ceramics. Yixing clay, renowned for its red-brown colour, has been used for centuries to make pots and this model has been heated in the kiln to 1200 degrees for durability. The Yixing collection is similar to the Japanese jars of Tokoname (a region considered to be one of the 'Six Ancient Kilns' of Japan) and we offer them at an affordable price.
