Description

Outside diameter: 37.5 cm. Interior diameter: 34 cm. Outside / interior height: 30/28 cm. To turn a tree into a bonsai you'll need this nursery pot, which is made in Japan and designed especially for this purpose. Featuring an enamelled flange, a large hole for drainage and holes to attach wires, this training pot aids aeration and the development of surface nébari roots. For example, take a maple or a tree from nature and let the young sapling grow in this frost-resistant, fine earth pot. When it's ready you can repot it into an elegant bonsai pot.

This is now possible to ship these fragile items on pallets, on quotation, for one pot or several tens of pots. Please contact us and tell us the reference of the item, the quantity, and the delivery address.
