Description

Multi-purpose normal grain bonsai soil used to grow many species.

Grain size Ø + -2/3mm and 4mm. Small sachet + - 2 litres. SUPERIOR QUALITY, DRIED FOR MORE THAN 2 YEARS. Weight according to the rate of moisture of +- 1.5 kilos.

Origin: natural volcanic earth from the mountainous regions of Japan.

Benefits: soil drainage and root ventilation for the healthy growth of your bonsai.

How to use: use alone, with Kanuma earth for acers, or add gravel and large-grained sand but not compost. This earth is not very nourishing and a Biogold fertiliser should be used regularly. You'll need to water this large-grained soil more in summer.

Species: for all conifer and caduc trees (for rhododendrons and azaleas you'll need Kanuma earth).
